

# FLIGHT CONTROL RACK

Aircraft Ground Support Equipment (GSE)  
P/N 3514

Engineered for aviation professionals, this Flight Control Rack ensures the safe storage, protection, and secure transport of critical aircraft flight control surfaces during maintenance, staging, and handling operations. Its robust design minimizes risk and maximizes efficiency in hangars and on ramps.

Designed specifically for aircraft flight control storage

Heavy-duty welded steel construction

Multiple angled support arms to prevent damage

Mobile base with industrial casters for hangar and ramp use

Stable, compact footprint for GSE environments

Built in the USA
